

**Amendments to the Specification:**

Please replace paragraph [0010] with the following amended paragraph:

[0001] EP[[-B]]-0825418 A2 discloses the use of several sensors to determine the position of a train. Data relating to position and error interval from several sensors, comprising beacons and GPS, is used to determine the position of the train. However, this system implies a calculation involving severals operations including integration. It is therefore considered as complex.
